Tutorial 1

Question No 1

Find the errors in the following program:

Class hello

    {

        Public static void main (String args[])

System.out.prinntlm(Hello World)

    }

```
class Hello // class is a keyword. All keywords should be in small letter
{

        public static void main (String args[])
        //public is a key word
        {
                System.out.println("Hello World");
                /*Hello World is a string value which
                should be enclosed in double quotation
                marks. Also, its println instead of
                prinntlm*/

        } /*compiler needs to know when the body of the
          scope has been started and ended. Unable to
          specify opening and closing of scope will give
          error message*/

}
```

Question No 2

Class college

{

    pbulic static viod call(string arg{})

  {

       system.out.print(45):

)

};

```
class College
{

        public static void main (String args[])
        {
                System.out.print(45);
        }

}
```

Question No 3

- Write a program to print your name
- Write a program to add two numbers 5 and 10.

- Write a program to subtract two numbers 5 from 10.

- Write a program to multiply two numbers 10 and 5.

- Write a program to divide 10 by 5.

- Write a program to find out remainder in between two numbers when 10 is divided by 3.

- WAP to add any three numbers and print the result with suitable message.
